

SM-8018 DUAL CHIP SILICONE RFID WRISTBAND

The SM-8018 dual chip silicone RFID wristband is waterproof and perfect for dual frequency applications at sport clubs, schools, pools, water parks, gyms, and spas. Available with 125 KHz, 13.56 MHz or UHF chips. Read distance of 15cm to 1 meter (depends on chips and reader types). Custom branding and different colors are available.

Construction: Two encapsulated RFID tags that are over molded in silicone.

Typical Applications: The SM-8018 is suited for use at beach parties, pools, waterparks and spas, lockers, gyms, sports clubs and for races and marathons. These wristbands can also be used for RFID access control and stored credit applications where a waterproof RFID wristband is required.

SYNOMETRIX offers a standard 1 year repair or replace warranty from date of shipping on products found to have a defect that results from manufacturing.
